Canada (Collect)

DUNCAN ART GLAZES 600 & 700 SERIES Product Name:

Product Type: Leaded Ceramic Glaze

2. COMPOSITION / INFORMATION ON INGREDIENTS

The ingredients in this formulation are a trade secret. All ingredients in the formula are non-hazardous, unless specified in Sections 3 and 15.

3. HAZARDS IDENTIFICATION

HMIS Hazard Ratings for Product

Fresno, CA 93727

3* 0 = MinimalHealth: Flammability: 0 1 = Slight Reactivity: 0 2 = Moderate Personal Protection: F (if spraying) 3 = Serious4 = Severe

* = Chronic Effects

ACGIH TLV Hazardous Components OSHA PEL CAS# % Silica, Crystalline-Quartz 1.5 mg/m^3 1.0 mg/m^3 14808-60-7 Up to 8

Frit is a fused silicate glass substance. The components of this glass product listed below are from the inventory of potentially hazardous substances referenced by FED/OSHA in 29 CFR 1910.1200.

Components **OSHA PEL ACGIH TLV**

Lead compounds, as Pb 0.05 mg/m^3 0.15 mg/m^3

Barium compounds, as Ba 0.5 mg/m^3 0.5 mg/m^3

Other Information

Frits are produced from the chemical reactions which occur during the high temperature smelting of various raw materials to form a molten glass. This glass is rapidly cooled and then ground to produce powdered frit. The lead listed for this product is incorporated into the glass structure of the frit, chemically reacted in the form of silicates of other essentially insoluble complexes. Exposure to the hazardous ingredients can occur if spray mist is inhaled or glaze ingested and the ingredient dissolves out of the glass. Because of the chemical stability of frit and its resistance to attack by acids or alkali, this is anticipated to occur very slowly. This product contains the following component(s) that require reporting under Section 313 of the Emergency Planning and Community Right-to-Know Act, also known as Title III of SARA (Superfund Amendments and Reauthorization Act), and 40 CFR Part 372:

> PERCENT PRESENT(a) COMPONENT Lead compounds Up to 28% (as PbO) Barium compounds Up to 5 % (as BaO)

(a) The percent reported is based on the theoretical composition of this frit. While existing in theory, the component(s) mentioned are only present as part of FRIT (CAS #65997-18-4*).

Duncan Enterprises Material Safety Data Sheet - Duncan Art Glazes 600 & 700 Series

4. FIRST AID MEASURES

Eye Contact: Flush eyes with large amounts of water until irritation subsides. Consult a physician. **Skin Contact:** Wash affected skin areas thoroughly with soap and water. Consult a physician if

irritation persists.

Inhalation: Move subject to fresh air; if breathing is difficult give oxygen. Consult a physician. **Ingestion:** If swallowed, consult a physician. Induce vomiting if prescribed under medical

supervision. Never give anything by mouth to an unconscious person.

5. FIRE FIGHTING MEASURES

Autoignition Temperature:NonflammableFlash Point:Not ApplicableUpper Explosive Limit (%):Not ApplicableLower Explosive Limit (%):Not Applicable

Extinguisher Media: Product is nonflammable – Use extinguishing

media appropriate for surrounding fire

Special Firefighting Procedures:Fire & Explosion Hazards:
Not Applicable
Not Applicable
Of a publicable
<p

6. ACCIDENTAL RELEASE MEASURES

Spill or Leak Procedures: Uncontaminated material may be recovered and re-used. If

contaminated scoop, vacuum, or wash into a receptacle for disposal.

7. HANDLING AND STORAGE

Handling: When product in use, do not eat, drink, or smoke. Wash hands immediately after

use. Keep sealed. Keep out of reach of children. Do not use this product if

pregnant or contemplating pregnancy.

Storage: Protect containers against physical damage; store in dry area away from feed

and food products.

8. EXPOSURE CONTROL AND PERSONAL PROTECTION

Respiratory Protection: If spraying, do not inhale mist. Use respirator that is NIOSH approved for

sprays and mists.

Ventilation: Local exhaust ventilation recommended

Mechanical (General): Recommended when spraying

Protective Gloves: Not needed for foreseeable conditions of use

Eye Protection: Wear safety glasses with side shields

Other Protective Clothing

Or Equipment: None needed

Work/Hygienic Practices: Good hygiene practices should be followed. When product in use, do

not eat, drink, or smoke. Wash hands immediately after use. Keep sealed. **Keep out of reach of children. Do not use this product if**

pregnant or contemplating pregnancy.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance / Physical Description: Colored liquid. Odorless

 pH:
 7 - 10

 Boiling Point:
 212°F

 Freezing Point:
 32°F

 Melting Point:
 1800°F

 Solubility in Water:
 Insoluble

 Specific Gravity (Water = 1):
 1.5 - 1.8

Bulk Density: 12.5 – 15.0 lb / gal

Evaporation Rate (Water = 1):

Vapor Pressure: 17.5 mm Hg @ 20°C (68°F)

Autoignition Temperature:Not ApplicableFlash Point:Not ApplicableOxidizing Properties:Not Applicable

10. STABILITY AND REACTIVITY

Stability:StableIncompatible Materials:None knownNFPA Reactivity Hazard Class:0 = Insignificant

Hazardous Decomposition Products: Avoid fumes when firing

Hazardous Polymerization: Will not occur Conditions to Avoid: None Known

11. TOXICOLOGICAL INFORMATION

Principal Routes of Absorption: Inhalation and ingestion

Effects of Overexposure: Of primary concern is chronic overexposure to lead. Initial warning properties are poor. Prolonged or repeated inhalation and/or ingestion of lead containing frit dust may result in lead poisoning, with symptoms of weight loss, stomach cramps, loss of coordination and joint and muscle pain. Lead can cause kidney damage and delayed effects involving the blood, gastrointestinal, nervous, and reproductive systems. Excessive exposure to lead dusts during pregnancy can result in neurological disorders in infants. For additional information consult OSHA lead standard 29 CFR 1910.1025.

Metal fumes and/or fluoride containing vapors from firing ma cause lung inflammation and injury in terms of hours with symptoms of chest pains, chills, cough, headache, and diarrhea.

Prolonged contact with frit dust can be very irritating to the eyes and/or skin. High dust levels can be irritating to the respiratory tract.

With adequate ventilation, dust control, and good personal hygiene, symptoms of overexposure should not occur. Advise regular medical monitoring of employees by a physician competent in industrial health.

Carcinogenicity: In IARC Supplement 7, inorganic lead compounds are given a 2B rating which indicates "sufficient evidence" for carcinogenicity to animals and "inadequate evidence" for carcinogenicity to humans.

12. ECOLOGICAL INFORMATION

No Data Available

13. DISPOSAL CONSIDERATIONS

Waste Disposal Method: Follow Federal or State and Local regulations for disposal. Lead is listed

in US-EPA CFR 40, Part 261.24. Testing of the waste may be required

to determine status under the hazardous waste regulations.

14. TRANSPORT INFORMATION

U.S. Department of Transportation Information

DOT Shipping Name: Consumer Commodity ORM-D Glazes or Stains

DOT Hazard Class: OA/OG 88690 Sub. 1

15. REGULATORY INFORMATION

This product contains lead and barium compounds, which require reporting under Section 313 of the Emergency Section of the Emergency Planning and Community Right-To-Know Act, also known as Title III of the SARA (Superfund Amendments and Reauthorization Act), and 40 CFR Part 372:

Products bearing the Caution Label are certified to be properly labeled in a program of toxicological evaluation by a nationally recognized toxicologist. The products are certified by the toxicologist to be labeled in accordance with the chronic hazard labeling standard ASTM D-4236.

California Proposition 65:

WARNING: This product contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.
